

S.W.A.T.

St. Mildred's Women Advancing Technology, also known as "SWAT", is an all girls robotics team from St. Mildred's-Lightbourn School. Dressed in our signature kilts, we have been actively involved in *FIRST* for ten years. Our "rookie" season was in 2002.

Outreach is a big part of *FIRST* culture in which we take pride in adopting. You can often find us showcasing our robot to the community during our off season or spreading the word of *FIRST* internationally. We have won many awards throughout the years including numerous Entrepreneurial, Spirit, and Judges Awards. We've just completed our most successful season. Our team's hard work and dedication had truly paid off when we achieved two of *FIRST*'s most prestigious awards the **Engineering Inspiration Award** and the **Regional Chairmans Award**.

Some highlights from our past include 2007, when we won the Waterloo regional and we were the first all female team in the history of *FIRST* to win the Regional Chairman's Award. In 2009 we won the Kleiner Perkins Caufield and Byers Entrepreneurship Award as well as the Xerox Creativity Award in 2010. For further information about our team, please visit
